

THREE-IN-A-ROW WORKSHEET

Name: _____

Can you get three correct answers in a row? Accuracy is the key to moving through the content in this exercise. Progress is based on the "3-Forward/1-Back Rule," which means you move forward in the exercise every time you get three answers in a row correct; if you answer incorrectly, you move back in the exercise.

Directions: Mark or click the circle for each correct answer. Leave the circle blank for an incorrect answer. Start a new row after an incorrect answer.

For Digital: In Acrobat, you may need to go to Preferences > Forms > Highlight Color and uncheck "Show border hover color for fields."
